## OF ANIMALS AND CULTURES

Animalibus: Of Animals and Cultures is an exciting new book series, co-edited by historian Nigel Rothfels and anthropologist Garry Marvin, and published by the Pennsylvania State University Press. Books in the series will share a fascination not only with the importance of animals in human life, but also with how thinking about animals can give us insights into human cultures, in different temporal and geographical contexts. Moreover, they will represent a wide range of disciplinary perspectives in the humanities and social sciences, including history, anthropology, social and cultural geography, environmental studies, and literary and art criticism.

Books in the series will be known for original research and innovative analysis; they will demonstrate an awareness of the existing literature in animal studies; they will eschew disciplinary-specific jargon to serve a wide range of audiences; and they will have a clear focus on learning something new about human cultures.

## The Breathless Zoo

Taxidermy and the Cultures of Longing

Rachel Poliquin

“With *The Breathless Zoo*, Rachel Poliquin has made a major contribution to the blossoming field of animal studies. This book is the new benchmark on the place of taxidermy in the social history of art, science, and popular culture. Marvelous, rigorous, and extensively well researched, the work is also refreshingly pleasurable to read. . . . Unlike other works on the topic, *The Breathless Zoo* examines not only what taxidermy is but also what it means. For those of us engaged in thinking about animals, this is the book on the culture of taxidermy we have long awaited—a book of great innovation that slices through the history of science, blood sports, and art.” —Mark Dion

## Gorgeous Beasts

Animal Bodies in Historical Perspective

Edited by Joan B. Landes, Paula Young Lee, and Paul Youngquist

“This innovative, accessible, and thorough collection addresses an admirable range of historical and geographical contexts to demonstrate that the human relationship with other species is complex and overdetermined, and that human systems of knowledge and representation are crucial for negotiating this uneven terrain. An essential teaching text, *Gorgeous Beasts* will find a welcome home in the HAS classrooms of many disciplines.”
